## Supporting Agriculture with business continuity planning and managing the supply chain disruption—webinar

As the COVID-19 pandemic continues to cause widespread disruption, it is important for the agriculture sector to collaborate, protect and formulate action plans to alleviate risks in order to survive.

BDO, in partnership with the Department of Agriculture and Fisheries, will deliver a series of webinars over the coming weeks to provide you with expert support to help you minimise the impact and lead discussions on the key issues as they unfold.

In our first live webinar, BDO's Business Continuity Planning Partner, [Mark Cushing](#) and Food & Agribusiness Executive Director, [Margaux Beauchamp](#) will outline guidance measures the agriculture industry needs to consider in response to COVID-19, and discuss vital measures to prepare and protect the supply chain now, and overtime. The session will cover:

- Business continuity planning measures and action items for consideration (including impacts on sustainability, health and safety, technology and supply chain)
- Insights and updates from within the industry's supply chain working groups
- Discuss strategies for supply chain protection as COVID-19 restrictions are put in place
- Live Q&A time to answer specific questions you have or share issues you are facing.

### Webinar details

**Date:** Thursday 26 March

**Time:** 1:00 pm - 2:00 pm

If you have any questions to submit before the session, please email [events.brisbane@bdo.com.au](mailto:events.brisbane@bdo.com.au) or submit your question in the registration form process.

Please register to receive more COVID-19 updates and invitations to future webinars dedicated for the Agriculture sector.
