

THE AUSTRALIAN TROPICAL HERBARIUM

# PLANT IDENTIFICATION SHORT COURSE

06-09 Feb 2023  
Cooktown

Join Cape York NRM for a three-day **FREE** course to learn how to examine and identify local plants.

## Day One

- Introduction and course overview
- Introduction to plant morphology and terminology
- Visit to native vegetation for hands-on review of course content
- Practice identifying specimens using the Australian Tropical Rainforest Plants Identification System (the "Rainforest Key")

## Day Two

- Revision of yesterday's material
- Continue to develop knowledge of the Rainforest Key
- Demonstrate how to prepare and write-up plant specimens for pressing
- Visit native vegetation, collect specimens for identification

## Day Three (optional)

- Review important rainforest plant families of the Cooktown area
- In the field, discuss methods for identification of eucalypts and wattles, introduce the "Lucid Keys" to these groups
- Open book test
